NOTICE OF ALLOWABILITY

Status of the Claims

This action is in response to papers filed 22 April 2004 in which claims 1 and 9 were amended. The amendments have been thoroughly reviewed and entered.

The previous rejections in the Office Action dated 22 January 2004 are withdrawn in view of the amendments that more clearly define the invention. The amendments include defining the solid support as microwells being at multiple locations on said support and being surrounded by coils suitable for introducing localized DC magnetic fields within said microwells wherein the method steps activate the coils to provide a localized DC field within each microwell. The prior art does not teach or reasonably suggest the claimed invention.

Claims 1, 4-9 and 12-16 are in condition for allowance.

AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Fox on 27 July 2004.

The amendment to the first paragraph of the specification submitted 18 June 2004 will not be entered.

An amendment filed under 37 C.F.R. 1.312 to add a first paragraph to the specification cross-referencing priority applications will be entered upon approval of Applicant's petition filed under 37 C.F.R. 1.78(a)(3).
